

ADAM

COMPANY
OVERVIEW

About Us

We deliver integrated offshore engineering, construction, and support solutions across subsea, marine, and topside scopes—designed for reliable performance in demanding offshore environments.

Formed through a strategic alliance between **Ambico Group**, specialists in subsea engineering and structural grouting, and **ADCI**, providers of offshore vessels and marine services, the platform brings together engineering depth and offshore execution capability under one unified platform.

Integrated
Delivery

Subsea
Expertise

Marine
Support

Global
Experience

With **over 75 years of combined global experience**, we deliver subsea construction, strengthening, pipeline intervention, platform upgrades, and offshore vessel support with a focus on safety and asset integrity.

CAPABILITIES AT A GLANCE

Adam Offshore brings together offshore engineering expertise, marine capability, and proven execution under a single delivery platform—focused on safety, integrity, and long-term asset performance.

Integrated Offshore Delivery

Engineering, marine, and offshore activities managed through a single delivery structure

Subsea & Structural Expertise

Specialists in subsea engineering, grouting, strengthening and rehabilitation

Marine & Vessel Support

Offshore vessels and marine resources supporting construction and field operations

Experience Driven Innovation

Solutions shaped by offshore experience and evolving project requirements

Bespoke Offshore Solutions

Project-specific approaches developed to address complex offshore conditions

ASSET LIFECYCLE SUPPORT

Offshore assets are supported from early operation through maturity and life extension. By integrating inspection, engineering, marine support, and offshore execution, solutions are designed to maintain integrity, minimise disruption, and sustain operations in demanding offshore environments.

We Support Offshore Assets Through Every Stage

**Integrated Offshore Solutions,
Delivered.**

Our Services

SUBSEA AND STRUCTURAL SOLUTIONS

Subsea and structural solutions support installation, inspection, repair, maintenance, and life extension, drawing on our extensive experience in grouting to restore integrity, improve performance and extend asset life.

Structural Grouting Services

Load restoration and foundation reinforcement

Pipeline Protection

Pipeline stabilization and free span control

Structural Strengthening & Platform Solutions

Engineered systems for repair and reinforcement

Scour Protection Systems

Seabed erosion remediation systems

OFFSHORE MARINE & FIELD SUPPORT

Offshore marine and field support is delivered through owned and chartered vessels supporting construction, IRM, logistics, and heavy marine operations, in compliance with international Flag and Class requirements and certified quality and safety systems

Diverse Offshore Fleet

Greenfield and brownfield construction support

Diving & Subsea Services

Inspection and execution

Topside Hook-Up & Revamp

Support for modification and reconstruction

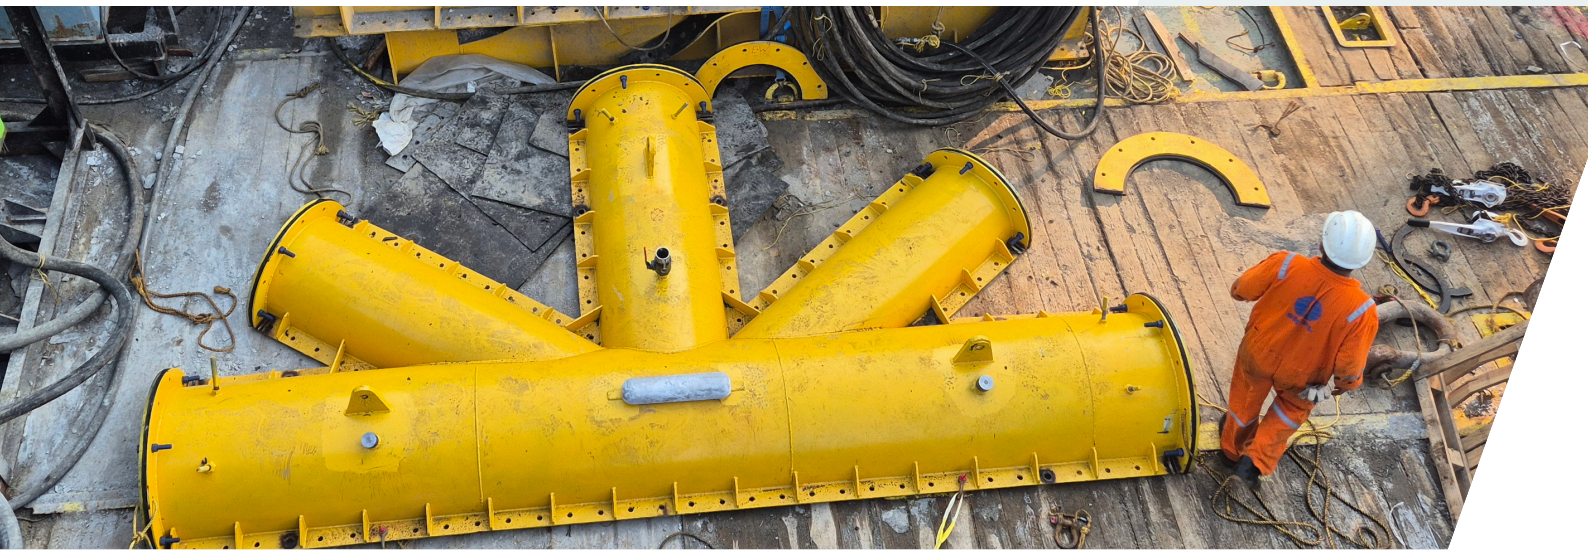

SBM, PLEM & Platform Support Services

Marine support for loading and manifolds

Inspection, Repair & Maintenance

Adam Offshore delivers integrated IRM solutions focused on maintaining asset integrity, extending service life, and ensuring safe, continuous offshore operations.

Combining subsea engineering, structural strengthening, marine support, and disciplined offshore execution, IRM services are delivered across the full asset lifecycle—from inspection and assessment through repair, intervention, and life-extension works.

Integrated engineering, certified QHSE systems, and fit-for-purpose assets enable safe and reliable execution from planning to completion.

A National First in Structural Rehabilitation

In 2025, Adam Offshore completed the repair and strengthening of 7 offshore jackets for ONGC Ltd. through complex subsea interventions using high intensity grout (110 MPA) at water depths of up to 100 metres.

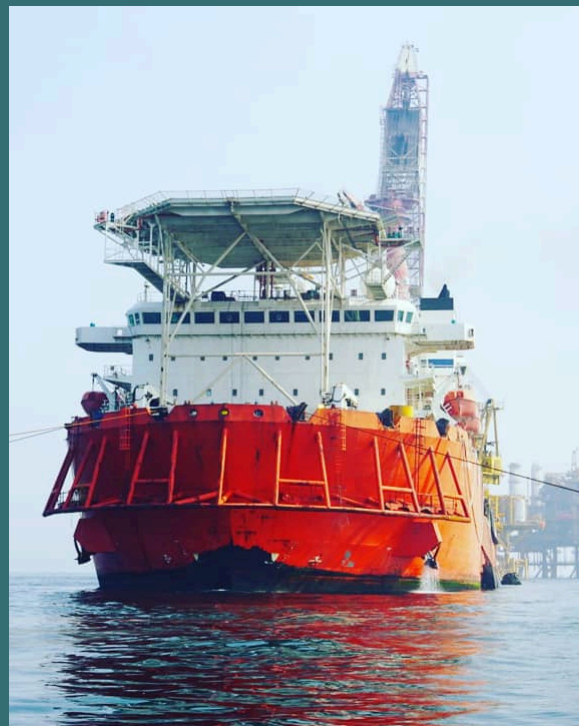

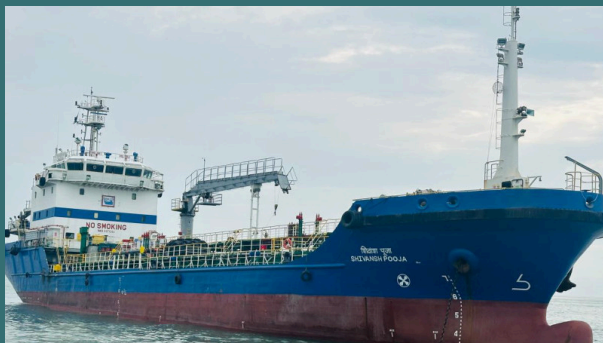

This project marked a milestone for the Indian offshore industry—**the first jacket strengthening programme of its kind delivered entirely using in-country engineering, materials, equipment, and offshore manpower.**

We continue to build on this experience—driving innovation, strengthening capability, and delivering more effective offshore solutions for future projects.

Our Fleet

Adam Offshore operates and charters a range of offshore support vessels including OSVs, AHTS vessels, accommodation workboats, and DSVs, supporting offshore construction, IMR, diving, and marine operations.

All vessels are manned by experienced crews and maintained to international standards, delivering safe, compliant, and reliable support for subsea, topside, pipeline, and platform activities.
